Dear Hiring Manager,

I hope you're doing well. I'd like to take a moment to introduce myself. I'm a dedicated Full Stack Developer with hands-on experience in both front-end and back-end technologies, including C#, SQL, JavaScript frameworks (Angular, React), and .NET Core. After starting as a Full Stack Developer at my previous company, I earned a promotion to Software Development Engineer by consistently delivering reliable, efficient solutions that improved system performance and streamlined workflows.

Here are a few key areas where I excel:

Full-Stack Development: Expertise in C#, SQL, HTML, CSS, and JavaScript frameworks (Angular, React, .NET Core) to build scalable and user-centric applications.

API Development & Integration: Strong experience in developing and integrating APIs, ensuring seamless communication across systems.

Process Automation & Efficiency: Skilled at automating workflows, optimizing efficiency, and reducing manual overhead in back-end solutions.

Code Reviews & Collaboration: Adept at conducting thorough code reviews and working with cross-functional teams to ensure secure, maintainable, and high-performing applications.

ADA Compliance & Accessibility: Led a 9-year ADA compliance audit for district websites, implementing WCAG updates across all platforms.

Adaptability & Continuous Learning: Quick to master proprietary languages and evolving tech stacks, maintaining a solution-oriented approach to software development.

I'm a U.S. citizen currently living in the Netherlands on a valid Dutch work visa. While open to U.S. remote roles that align with Central European Time, I'm also available for in-office, hybrid, and fully remote opportunities within the Netherlands. To better integrate into both the local culture and professional environment, I've been actively learning Dutch.

Thank you for taking the time to review my LinkedIn and personal website. I'd love to learn more about your organization's objectives and discuss how my experience can help you achieve them. Please feel free to reach out at your convenience.

Sincerely,

Skylor Wixom

Full Stack Developer Profile

Dynamic professional with extensive experience in designing and maintaining front-end and back-end systems. Expertise in utilizing C#, SQL, HTML, CSS, and various JavaScript frameworks and modern frameworks, such as Angular, React, and .NET Core to enhance development efficiency and user engagement. Ability to create intuitive web interfaces and develop APIs for diverse user groups, for seamless integration across departments. Skilled in designing scalable, user-centric applications while ensuring code quality through test-driven development and code reviews. Adept at conducting code reviews and automating processes to significantly reduce manual workloads. Skilled in collaborating cross-functionally to deliver seamless, high-performing solutions that meet user needs and business objectives. Strong leadership and adaptability, honed through a successful career transition from managing automotive operations to software development, with a commitment to lifelong learning and continuous improvement.

Operating Systems: Windows | Linux

Career Experience

Weber School District, Ogden, Utah

2022 – Present

Software Development Engineer | Full-Stack Developer

Develop reusable components and establish standardized design systems to boost development efficiency and scalability. Enhance user engagement and system usability in PowerSchool student information system through intuitive web interface design and API development for educators, students, and administrators. Collaborate cross-functionally with development teams and departments to ensure seamless integration. Conduct code reviews to guarantee secure and maintainable code, and automate state reporting processes by crafting back-end solutions for file uploads to SFTP servers, significantly cutting manual workload.

- Resolved longstanding ADA compliance issues, completing all WCAG updates across district websites, thus closing a 9-year accessibility audit.
- Design and maintain both front-end and back-end features for PowerSchool SIS by utilizing C#, SQL, HTML, CSS, AngularJS, jQuery, and PSHTML.

Jiffy Lube, Ogden, Utah

2007 – 2022

General Manager

Led budget oversight, implemented coaching programs, and initiated training efforts to elevate team performance and operational efficiency. Leveraged data analysis and relationship skills to address challenges and refine procedures for greater effectiveness.

- Achieved status as top-performing location in Northern district for five consecutive years.
- Directed daily operations achieving 95% customer satisfaction through optimizing processes and guiding team management.
